SUMMARY:

Full Stack Developer with 2+ years of experience building scalable web applications, **AI-powered** products, and end-to-end solutions using Next.js, React.js, Node.js, Express.js, and TypeScript. Proven ability to take **ownership** of projects from ideation to deployment, including **designing system architecture**, leading technical decisions, and delivering production-ready applications.

Successfully designed and developed multiple **freelance projects** independently, translating business requirements into practical, user-centric solutions. Experienced in leveraging **AI-native engineering** tools such as Cursor, GitHub Copilot, Claude, and GenAI APIs to accelerate development, automate workflows, and improve engineering productivity.

Passionate about **leadership** and collaboration, with a strong interest in mentoring, driving technical initiatives, and building reusable component systems, REST APIs, and full-stack applications that solve real business challenges. Continuously seeking opportunities to lead teams, contribute to product strategy, and create impactful software at scale.

DSA + Debugging + Consistency = Great Software Engineer

SKILLS:

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Redux

Backend: Python, FastAPI, Node.js, Express.js, NestJS, REST APIs, WebSockets

Databases: PostgreSQL, MongoDB, MySQL, Supabase

Tools: Git, GitHub, Vercel, Docker, Cursor AI, Copilot, Claude

EXPERIENCE:

Uzence Design Studio | Frontend Developer Lead

Sep 2025 - Present

- Conducted 100+ code reviews, mentored 5+ developers and reduced production issues by 30%.
- Led enterprise Design System development with 100+ reusable React components reducing UI development time by 40%.
- Implemented WCAG 2.1 AA accessibility standards including ARIA and keyboard navigation.

PROJECTS:

Gym Management & Discovery Platform | (React Native, Expo, TypeScript, Supabase)

- Built a scalable cross-platform gym management platform solving manual membership tracking, attendance management, and payment handling challenges for gym owners.
- Developed a multi-tenant role-based system enabling gym owners to manage memberships, attendance, payments, and gym operations while members discover and join gyms.
- Designed and integrated a QR-based attendance system, allowing members to check in via QR scanning and providing owners with real-time attendance analytics and reports.

AI-Powered Mock Interview Platform | (Next.js, Express.js, Gemini AI, Groq AI)

- Built an AI-powered interview preparation platform solving the lack of personalized interview practice and instant feedback for job seekers.
- Integrated Gemini AI to dynamically generate role-specific interview questions, evaluate responses, and provide real-time improvement suggestions.
- Optimized backend APIs and AI request handling to improve response speed, scalability, and user interview experience.
